

Air Quality Assurance Unit

Fiscal Year 2010 (FY2010) Accomplishments

- Performance and system audits of instruments.
- Issued reports for each audit and audit failure reports when appropriate.
- Certified standards, including certification of cylinders, flow devices, temperature and pressure devices.
- Provided technical assistance to other agencies and air quality monitoring section when requested.

Number of Instruments Audited

Management decisions based upon budgetary shortfalls resulted in:

- Reduction of the number of instruments audited.
- The decision to cease pre-ozone season audits.
- Reduction of audits performed on analyzers operated by Springfield City Utilities.
- Reduction of audits performed at confined animal feeding operations site.
- Other minor changes to the air monitoring network.
